801.663.9323 | caleb.mckay.a@gmail.com

Experienced Full Stack and Salesforce Commerce Cloud Developer skilled in B2C eCommerce solutions. Proficient in OCAPI/SCAPI, JavaScript, React, Node.js, and HTML/CSS for custom storefront development. Expertise in integrating APIs to enhance user engagement and platform functionality. Collaborative team player recognized for performance optimization, responsive design, seamless cross-device experiences, and scalable, conversion-focused digital commerce solutions.

WORK EXPERIENCE

FULL STACK DEVELOPER

Groupe Dynamite Inc. | Montreal, QC

01/2023 – 09/2024

- Collaborated to deploy Salesforce-based loyalty ecosystem using **React**, **JavaScript**, and **Redux** with **Salesforce Service Cloud REST APIs**
- Developed **10+** reusable components based on **Figma** designs like, modals, forms, layouts with **CSS Flexbox**, and custom Salesforce integrations, using **SFRA**, **React**, **Redux**, and **CSS**
- Enhanced shopping cart functionality with **CSS** animations, utilizing **SFRA** shopping basket data for dynamic free shipping progress bar
- Improved Loyalty Program UX by integrating real-time data from Loyalty Management Software's **REST APIs**

FULL STACK DEVELOPER

Cricut | South Jordan, UT

12/2021 – 09/2022

- Contributed to Magento-to-Salesforce migration, integrated Affirm, and optimized site performance for all storefronts
- Utilizing **ISML**, **JavaScript**, and **CSS**, revamped PDP features like Quantity Stepper and Back in Stock Notifications, reducing support tickets related to product page UX
- Created **20+** reusable, **ADA**-compliant UI components like, modals, carousels, and forms, with **ISML**, **JavaScript**, and **CSS** for international storefronts

FRONT END WEB ENGINEER

Cricut | South Jordan, UT

09/2018 – 12/2021

- Created and implemented a **custom** and significantly smaller **design system** with **JavaScript** & **CSS** to replace existing system, leading to better **performance**, faster page loads and development
- Developed a responsive carousel from scratch with touch functionality, enabling infinite scroll and improving mobile usability, utilizing **JavaScript** and **CSS** leading to a boost in mobile session duration.
- Collaborated across departments to merge a marketing site with an eCommerce platform, localized content for global audiences, increasing conversion rates and international accessibility.
- Engineered a **JavaScript**-based **micro-app** utilizing the **Cricut Heat Guide** to provide dynamic step-by-step instructions tailored to user input, enhancing task accuracy and user engagement.

PROJECTS

GREEN PIG PUB – WEBSITE

<https://lordsahvith.github.io/green-pig-pub/index.html>

LIVE FROM 2019 – 2023

- **Increased business** by updating to a more modern site, appealing to existing & younger audiences with easier to read fonts that used device's default font size as a base
 - First created with **HTML**, **CSS**, **JavaScript** & **jQuery**, then converted to **PHP templates** for **WordPress**
 - Installed **WordPress** on **HostGator** server for business to manage all content like images and copy
 - All animations were built from scratch using **CSS3 Animations** & **jQuery**
 - All pages have their own URL for **SEO** and for better guest experiences by conforming to Health and Safety protocols during & after the Pandemic for no-contact menus, using **QR Codes**
-
